Alex Morgan

Alexander James Morgan · AI Systems Architect
San Francisco, California, US · alex.morgan@example.com · +1 (555) 010-2026 · https://alexmorgan.dev

SUMMARY

Alex Morgan is a systems engineer and software architect with a decade of experience designing scalable distributed runtimes, AI tool execution frameworks, and security-hardened agent platforms. Known for balancing rapid prototyping with strict fail-closed sandboxing, Alex has led platform infrastructure initiatives that bridge low-level execution with intuitive human-in-the-loop interfaces.

EXPERIENCE

Staff AI Engineer — Anthropic Ecosystem · Remote (2024 to now)
Lead AI systems architecture for autonomous agent orchestration and multi-turn tool execution.

Senior Systems Architect — Cloud Infrastructure · San Francisco (2021 to 2024)
Designed cloud infrastructure and distributed runtime platforms at scale.

Distributed Systems Engineer — Lumen Systems · Seattle (2019 to 2021)
Built distributed services and developer tooling.

SKILLS

- Autonomous Agents
- Distributed Systems
- React 19 & Next.js
- Compiler Design
- TypeScript, Node.js, Playwright, Python

EDUCATION

Master of Science in Computer Science, University of Washington.
